SUMMARY

Principal UX Designer with 20+ years building software for technical professionals. Background in data sensemaking — visualization, search, analysis, and the long tail of how users build cases from large datasets. Currently focused on the user experience of AI agents and the products being built around them. Full-stack designer: equally comfortable in design tools, in code, and in the prompt.

EXPERIENCE

Principal UX Designer, AI — Tricentis

Jun 2025 – Present · Austin, TX (hybrid)

- Design and coordinate a unified experience for AI features across the Tricentis product suite.
- Center AI strategy on empowering human users rather than displacing them.

Staff Designer — Grafana

2023 – 2025

- AI/ML team: industry, technical, and customer research to shape Grafana's AI strategy.
- As-code team: design patterns for automating and provisioning Grafana.

Principal Designer — FeatureBase

2021 – 2023

- Designed the company's new SaaS UI for a realtime bitmap-indexed database.
- Built design-process foundations: ceremonies, tooling, design system.
- Established research practice and a core of friendly users.

Lead Engineer / Principal Designer — SolarWinds

2011 – 2021

- Led design on three new products, three major platform features, and many feature releases.
- First year was integrating Hyper9 into the SolarWinds product family.

UI Lead — Hyper9

2007 – 2011

- Led UI design and construction for a suite of search-based tools for managing virtual environments.
- Built first as HTML/XHR SPA, then in Flex. Company acquired by SolarWinds.

Engineer — Surgient

2003 – 2007

- Built UI, API, data model, agent protocol, and bulk-editing tools for VM-image automation software.
